

# QUICKSTART GUIDE

By Aurelius Tjin

## How To Customize The Salesletter

Modify anything you'd like on the page to fit your needs.  
Replace text in pink, and make sure to read through it carefully.

## How To Customize the Word File

You'll need Microsoft Word to open the .doc file. If you don't have Word, you may alternatively download <http://www.openoffice.org> for free.

Make sure to edit the author name, put your own offers, change the title (optional), and you're free to add your own content to add more meat to it.

## How To Convert a Word Document To PDF File

If you'd like to go the free route, use PDF995 [www.pdf995.com](http://www.pdf995.com). These free PDF programs aren't always reliable. The links in your document may not be clickable after the PDF conversions.

I use Adobe Acrobat Professional, which is quite dear in terms of price. An alternative would be to use [PDF Creator](#)

## How To Customize The Graphics

Use Photoshop to edit the .PSD files. You can get a 30 day trial version of Photoshop here: <http://www.adobe.com/downloads/>

I've supplied you with a bonus action script to turn your 2D report to a 3D eCover report. But do note, this is only for Photoshop users. It does not work with Elements.

If you don't have Photoshop, you may use the blank graphics (supplied) to add your own titles. Use a free graphics software, such as GIMP, to edit your graphics if you don't have Photoshop.

## How To Upload Your Files To Your Server

Watch this video tutorial I recorded for you:  
[Click here](#)

I use [SmartFTP](#) to upload files to the host
