

Branding Instructions

How to use the PDFBrand software and what you should input for each tag.

To brand the PDF file with your own name and link, simply double-click PDFBrand.exe and open the ebook to be branded with it. (The ebook will be labeled with the word "brand" in its file name.) Drag the brandable ebook file into the open PDFBrand window.

Once PDFBrand.exe analyzed and opened the PDF, it'll show you a list of "tags" and empty fields right next to each tag.

Simply enter the appropriate information into the fields:

{--YourName--} = Enter your name or company name.
(Example: Xyz Co.)

{--YourURL--} = Enter the URL you would like displayed. **The http://www.** has already been filled in for you, so you don't need to re-enter that portion.
(Example: **xyz.com**)

{--yoururl--} = Enter the URL address that you would like the reader to be taken to when he clicks on it. This can be the same URL that you are displaying above, or it can be different. (Example: **xyz.com/index.html**)

Once you're finished, click the "Brand!" button. The Brander will then come up with a dialog box, asking you to automatically save a copy of the PDF under a different name in the same location as the original file.

Click 'OK' to automatically save the PDF, 'Cancel' if you want to save it under a different name or in a different location.
