

# Customizing Your Gmail

This product came about after a bunch of us in one of the popular Forums were talking about our favorite email program.

I began waxing poetic about all the great features available in gmail and labs, and was amazed to learn that many of the marketers there hadn't been putting them to use.

A series of tutorials was requested, and this product is the result!

As a marketer I've been amazed at how Gmail helps me to stay organized. It's truly the best free email available - you can use it to organize your email, send and reply from multiple email addresses, set up a task management system, and more. In these videos, you'll learn how.

I'm also including a list of additional resources - Firefox plugins, additional tweaks, and more. I use a few of these myself, but didn't bother with a video because everyone's situation is unique.

Resources:

[\*\*Firefox Extensions and Greasemonkey Scripts\*\*](#)

[\*\*Gmail Manager\*\*](#)

[\*\*Remember the Milk for Gmail\*\*](#)

[\*\*David Allen's Getting Things Done - for Gmail\*\*](#)

These resources, combined with the included videos, will help you to truly customize your gmail.

Put your gmail to work today!

Seeking YOUR Success,

The Unselfish Marketer
