

How to Use Opt-In Templates

Using the opt-in templates is quite simple. You will need...

- * Your Subscription Form Code (From Aweber or other List Service)
- * An HTML Editor or Basic Windows Notepad

You can open the opt in templates in any HTML editor or notepad and replace the "dummy" form with the form code from your list host.

Be especially careful not to leave off any of the code given to you by the list host. Most list codes include hidden fields that must remain intact. For best results, replace the code from <form> to </form>.

You can later adjust your field widths (to make them fit) by editing the lines that look like this:

```
<input type="text" name="textfield2" size="15">
```

(Note: the "size" variable controls the length of your form fields)
